COMPANY INTRODUCTION

OVERVIEW

Bridge Group was founded in April 2017 in the USA with the backing of Bridge Funding & Investments Limited. Bridge Group is the organisation behind FIPNEXT. Since its establishment, the company has achieved global expansion into major financial centres such as Hong Kong, India, Europe, and Dubai. Specialised in Wealth management. We proudly manage funds for over 6,000 clients worldwide. Among our notable offerings is the innovative FIPCOIN, which will be recognised as the world's first cryptocurrency that provides fixed returns unaffected by market fluctuations. Under the guidance of our CEO, Mr. Krishna, who possesses extensive experience in international banking and IT, our company is committed to incorporating blockchain and Web3 technologies into our financial solutions. This approach guarantees transparency, stability, and innovation in the realm of digital assets.

MISSION & VISION

MISSION is to inspire individuals to embrace a disciplined wealth-building system by providing expert guidance, innovative tools, and a supportive community that fosters long-term financial growth instead of succumbing to such traps.

VISION is to be the leading global hub for investors, fostering innovation, education, and financial independence through secure, transparent and cutting-edge digital asset solutions.

- Headquarters – Czech Republic
- Industry – Wealth Management
- CEO – Mr. Krishna
- Website – www.fipnext.in
- Legal Name – FIPNEXT

OUR JOURNEY

Mr. Krishna, CEO, collaborated with him in 2019, boasts a wealth of experience & reputation spanning 20 years in IT, Banking, and Trading. He has successfully provided digitisation services for Andhra Bank (now UBI)

Bridge Global Holdings Limited

has been managing funds for High Net Worth Individual (HNWI) clients for the past nine years, with an online presence spanning six years in both Mauritius & Seychelles

Bridge Investments LLC

Based in Hong Kong and the USA, has been serving clients for a decade and maintains a physical presence in both locations

Bridge ECommerce & Technocrats Private Limited

has been serving clients in the IT sector for the past eight years, managing its in-house operations effectively

FIPTRADE

embarked on its journey in 2024 and has now introduced its BOT, empowering clients to independently manage their funds on our exchange

FIPNEXT

began its journey in 2024 and officially launched in 2025. Unlike a typical crypto exchange, it offers a comprehensive blockchain banking system including a fixed income model and staking model

FIPCOIN

announced in 2024, FIPCOIN is heralded as the world's first cryptocurrency, providing investors with dependable returns through its stable value and secure staking model. It also presents a variety of unique and innovative use cases, including Crowdfunding for movies, a decentralised wallet, a Universal blockchain explorer & more..

ABOUT FOUNDER

Mr. Krishna, The CEO

“Envision the seemingly impossible and turn it into reality before others even consider the idea.”

This isn't merely a motivational phrase; it embodies the philosophy that has guided Krishna's life and career. At the young age of 18, he ventured into the realm of telecom and IT operations as a part-time employee for a few days. However, he quickly transitioned into a full-time contractor role with leading Indian banks for digitisation. By the time he turned 24, Krishna had launched his first company and subsequently established a legacy of successful enterprises: NSPIRE Solutions, Viswash BPO, and Unique IT & BPO Solutions. His ventures focused on IT automation, BPO, and finance, providing innovative solutions to complex operational challenges. In 2017, he collaborated with **Bridge Group of Companies**, where he continues to spearhead large-scale financial and technology initiatives, including **Fixed Income Models**, concentrating on wealth management and private placement programs.

With expertise in trade finance, OTC trading of currency & crypto assets, and private wealth management, Krishna has facilitated the issuance of over \$500 million in financial instruments and assisted more than 100 high-net-worth clients in diversifying and safeguarding their investments.

Through FIP and its new initiatives, **FIPNEXT**, **FIPTRADE** & **FIPCOIN**, Krishna aspires to create a financial legacy that empowers investors, shields them from market volatility, and inspires the next generation to explore the boundless potential of blockchain.

IT & TECH OUTSOURCING

- Creating custom platforms, fintech tools, and enterprise systems
- Utilizing global talent for scalable digital transformation
- Comprehensive Software development & IT Services, Outsourcing

REGULATORY STRUCTURE

Bridge Investments LLC

India, UAE & USA

Founded and registered in 2017, serves as the official seller of FIPTRADE.

Our technologies are created and licensed under the name "Bridge E-Commerce & Technocrats Private Limited," a company established in India in 2018 and registered under the Companies Act.

Our bot is exclusively accessible through our licensed cryptocurrency exchange, "FIPNEXT," which is licensed under the name "LUNEXOR S.R.O." from European Regulator MICA.

Our accounts are regularly monitored by our Chartered Accountants affiliated with "Bridge Funding & Investments Limited," which operates from both Hong Kong and India.

Additional licensing for fund transfers, debit cards, and currency exchange in multiple countries, including FIU India, is currently in progress. This advancement strengthens our position as a more compliant and regulated organization, resembling that of a full-scale investment bank.

LEGAL COMPLIANCE

Our operations adhere to the regulatory frameworks established by the aforementioned companies within which we operate.

We are committed to maintaining compliance with local laws and regulations that govern our product sales. This dedication includes, but is not limited to, practices such as **IT**, Goods and Services Tax (**GST**), Know Your Customer (**KYC**) requirements, **AML** and **data protection** regulations.

We ensure that all our products and services align with the applicable legal standards, providing our clients with transparent and secure trading opportunities.

Our loyalty program is a crucial aspect of our market acquisition and development strategy. These incentives are designed to enhance our sales without inappropriately enticing customers or making participation a requirement for generating profits from the Bot.

FAQ – PRODUCTS

What inspired you to build the community after ten years of your journey, rather than at an earlier stage? Additionally, what are your expectations from this community?

In today's society, numerous individuals find themselves captivated by gambling, online gaming, betting applications, and tempting high-yield schemes, often disregarding their backgrounds or identities. Regrettably, these fraudulent companies take advantage of the hard-earned money of unsuspecting people. Observing this situation and researching global markets for a decade, our founder recognised that we should promote authentic practices by educating others on the realities of wealth-building. Our primary goal is not to attract more money into the company, but rather to prevent individuals from investing in fraudulent enterprises.

We expect our community to share **insights on transforming money into wealth** while safeguarding capital and avoiding these alluring schemes. The founder envisions that when **FIPNEXT** establish a strong community presence in the market, individuals will be less tempted to seek out alternatives.

Is your platform registered with SEBI or RBI in India?

Cryptocurrency platforms in India operate without regulation from SEBI or RBI. We are in the process of applying to the Financial Intelligence Unit (FIU India), as all crypto platforms in India must be registered with the FIU.

How are you regulated to manage these operations?

Our exchange is officially registered in the Czech Republic, Europe, for cryptocurrency under the MICA regulation, operating under the name Lunexor SRO. For further details, please visit our exchange at <https://fipnext.in>

As a cryptocurrency exchange, what strategies are you employing to implement fixed income models while attracting investments from the public?

A cryptocurrency exchange operating under the MICA Regulation (EU) 2023/1114 can manage investor funds by obtaining consent through a Fiduciary Mandate. This enables us to handle the funds effectively while aiming to provide targeted returns for the investors.

How confident are you that you will consistently facilitate these types of trades to generate fixed revenue?

Over the years, we have established ourselves by facilitating large-scale trades. In the past, these activities were conducted manually; however, we have now developed an automated tool called FIPTRADE. This innovative platform gathers deals from traders across various exchanges worldwide. In addition to FIPTRADE, we maintain fixed volumes with our existing traders.

Are we able to view these trades on the exchange?

Certainly! This is why we are offering you access to your funds on our exchange, which allows you to monitor all trades made with your funds as margin. Typically, you can expect around 3 to 4 trades each week.

We are still skeptical about whether trading activities can produce consistent income like this?

This skepticism is completely understandable. However, it's crucial to recognize that your funds are not being used for trading activities. Instead, they are supporting the exchange in conducting these operations. Therefore, the risk remains zero. You are essentially investing in the exchange to facilitate its operations, rather than engaging in trading activities that could expose you to higher risks.

Many Platforms & Schemes available in the market; Why should we invest with you, why not others?

We proudly present ourselves in the market, supported by a proven track record and positive client feedback. Furthermore, you are engaging with a family-owned business that has strong references, with many clients having travelled with us for a decade, meeting and conversing with us directly. This means you will be working with a legitimate company that has proper authentication.

How can we get confidence in you to invest, and what assurances do you offer for our investments?

We encourage you not to proceed blindly; please consult with the individuals who referred you to us and gather their feedback. Ask them if they can provide you with the same level of confidence. You will receive a contract that outlines payment schedules, along with a post-dated cheque from our company. This also includes the KYC details of the authorized signatory, which has been our standard practice for the past ten years.

How can one achieve such ROI without any risk?

By trading currencies in substantial volumes on global exchanges and managing risks effectively, we can achieve a satisfactory return on investment (ROI).

Where are you allocating our funds, and what are the associated risks, tax implications, or KYC exposures related to these activities?

This is a crucial topic that you should be aware of upfront, and our response is straightforward and clear. Any funds you invest with us will be held in our exchange as a guarantee for our buyers and sellers during their trading activities. This means your funds consistently serve as a counter-guarantee, demonstrating that our exchange maintains the necessary liquidity to facilitate trading. At no point will your funds be exposed to trading activities or risks, and your KYC information will not be shared with any third-party users.

Will you be offering any shares or equity in your company to ensure our investments are secured?

We are currently offering a Private Investment Agreement along with Post-Dated Cheques for both the principal amount and the profits. Since we are not handling unknown public or retail funds at this time, we are not issuing shares or equities until we obtain the retail fund management license.

Is it possible for us to invest in foreign currencies from other countries and receive profits in India?

We gladly accept funds from any currency/country into our accounts in India, the USA, and the UAE. You can also receive your profits according to your preferences, whether in various countries or directly in India.

When all our funds are held in an exchange, how can you generate consistent revenue for us?

This setup allows these parties to engage in trades, The profits generated from these transactions are distributed through a fixed income model to Party A.

If that is the case, could we potentially become Party B or Party C without our knowledge?

Party B

This party is looking to **Buy** USDT on our exchange

Party C

This party aims to **Sell** USDT on our exchange

Party B and Party C are the traders with whom we have signed an agreement

To provide stable currencies such as USDT, USDC, and EURC at competitive prices on our exchange.

Party B

Party C

Party A

Both parties are attracted to our exchange primarily by two factors: the price of the currency they want and the liquidity provided by Party A.

Consequently, the difference in profits results in our guaranteed profit with no risk at all.

Since you will be receiving our funds in INR and discussing cryptocurrency activities, will our funds be converted into any currencies/cryptocurrencies, potentially resulting in crypto taxes/FEMA rules?

When you choose to invest with the company in INR, your fixed profits will be provided solely in INR. A 10% TDS will be deducted from your monthly payments, and the relevant taxes will align with your current income tax brackets. Furthermore, if you prefer, you can receive your monthly payments in the USA and UAE without any deductions. Since we do not convert your funds into other currencies and you are not transferring money in foreign currencies, FEMA regulations will not be applicable in this situation.

Can I withdraw our funds whenever we need?

Yes, you may withdraw your funds with prior notice; however, since our contract requires a minimum commitment of one year, it's advisable to keep your money with us for the full duration to offer you a better return on investment (ROI).

What is the ROI we receive, and what does the payment cycle look like?

Our return on investment (ROI) ranges from 1.5% to 3.5% per month, depending on your investment amount, and will be negotiated during the contract process. As specified in the contract, your ROI payments will be disbursed on the 5th of every month.

What is the minimum and maximum amount we can invest with you?

The minimum investment required is ₹50 Lakhs (or \$60,000). However, if you prefer to start with a smaller amount, such as ₹10 Lakhs, you are welcome to do so and increase your investment over time. This option is ideal for individuals who may not have substantial investments or those looking to scale up gradually. There is no limit on the maximum investment amount.

I have some additional concerns that haven't been addressed here. How can we reach you?

We're only a phone call away! Don't hesitate to reach out to us, or feel free to meet with us in person.

If I am interested in proceeding, what are the next steps?

- Sign up at <https://fipnext.in>
- Complete your KYC
- Deposit the funds
- Receive your contract and cheque

That's it! Your transformational journey begins,
Your money grows into wealth.
